RESPONSE TO AMENDMENT

1. Applicant's amendment filed 10 April 2003 is acknowledged. Claims 1, 3-7, 9-14, and 16-19 are pending in this application. On consideration, the finality of the previous office action is withdrawn. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior office action.

Claim Rejections/Objections Withdrawn

2. The rejection of claims 20, 21, 23, and 26 under 35 U.S.C. 112, first paragraph, is withdrawn in response to Applicant's cancellation of these claims.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 3-7, 9-14, and 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. patent applications 20030073637, Uutela et al., priority date November 10, 1998, 2002016470 and Eriksson et al., priority date November 10, 1998.

Uutela et al. teaches PDGFD (figure 7), which is identical to the instant SEQ ID NO: 2 and thus comprises the truncations specified in the instant claims. Detection of this protein using an antibody is taught in paragraphs 57-60 and 161-164. Detection as useful in the diagnosis of cancer is specified in paragraph 60.

Art Unit: 1646

Eriksson et al. also teaches PDGFD (figure 7). Detection using an antibody is taught in paragraphs 57-60 and 161-164; detection as useful in the diagnosis of cancer is specified in paragraph 60.

5. The specification is newly objected to because there is no sequence listing present and no request that the sequence listing of the parent be used was made.

NO CLAIM IS ALLOWED.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janet Andres, Ph.D., whose telephone number is (703) 305-0557. The examiner can normally be reached on Monday through Friday from 8:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler, Ph.D., can be reached at (703) 308-6564. The fax phone number for this group is (703) 872-9306 or (703) 872-9307 for after final communications.

Communications via internet mail regarding this application, other than those under U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to yvonne.eyler@uspto.gov.

All Internet email communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark Office on February 25, 1997 at 1195 OG 89.
